VETERINARY CERTIFICATE
for export of porcine semen from Finland to Vietnam

I General information

I.1 Certificate number	I.2 Competent ministry of exporting country Ministry of Agriculture and Forestry of Finland
I.3 Competent central authority of exporting country Finnish Food Authority	I.4 Competent local authority issuing this certificate
I.5 Country of origin and ISO Code Finland FI	I.6 Country of destination and ISO Code Socialist Republic of Vietnam VN
I.7 Consignor / exporter Name Address Email address	I.8 Consignee / importer Name Address Email address
I.9 Semen collection centre Name Address	I.10 Place of destination I.11 Means of transport and air waybill number
I.12 Seal number(s)	I.13 Total number of doses

II Identification of the product(s)

#	II.1 Identification number of the donor boar	II.2 Breed	II.3 Name and address of the premises of origin of the donor boar
1			
#	II.4 Date of collection	II.5 Number of tubes	II.6 Identification marking on straws/ampoules
1			

V Attestation

I, the undersigned Official Veterinarian, do hereby certify that:

1. Finland or a zone of Finland where the donor animals originated from and were kept, is free from foot and mouth disease (FMD), classical swine fever (CSF), African swine fever (ASF), Aujeszky's disease (AD), porcine respiratory and reproductive syndrome (PRRS) and transmissible gastroenteritis (TGE) in accordance with the Terrestrial Animal Health Code of World Organization for Animal Health (WOAH);
 2. the semen described above was collected from porcine animals held at the semen collection centre which is approved by the competent authorities of Finland and is under official veterinary supervision. The procedures for approval, the health and the hygiene control at the semen collection centre are conducted in accordance with European Union legislation and WOAH Terrestrial Animal Health Code;
 3. boar or teaser animals are only inserted at the semen collection centre if they are found to be clinically healthy. There have been no clinical cases or other evidence in the animals of the following diseases for the past 12 (twelve) months prior to collection and the dispatch of semen to Vietnam:
 - a. brucellosis
 - b. TGE
 - c. PRRS
 - d. swine vesicular disease;
 4. the semen was collected from donor animals which were found to be clinically healthy and free from clinical signs of disease on the day of collection;
 5. all porcine animals admitted to the semen collection centre have been tested for brucellosis (*B. abortus* and *B. suis*) with a negative result within 30 (thirty) days prior to the start of the quarantine period at the quarantine facility;
 6. the donor animals and any teaser animals used in the collection of the semen have been tested for PRRS with a negative result within 30 (thirty) days prior to the start of the quarantine period at the quarantine facility and re-tested for PRRS with a negative result at the quarantine facility within 14-21 days after the first test using methods recommended by the WOAH;
 7. all donor animals and teaser animals admitted to the semen collection centre are chosen from herds or holdings which are free from brucellosis in accordance with WOAH Terrestrial Animal Health Code;
 8. all animals kept at the semen collection centre are subjected to routine tests for brucellosis with negative results, with the test being carried out at least every 12 (twelve) months;
 9. TGE is an officially notifiable disease and no clinical cases have been recorded in the last 3 (three) years in Finland in accordance with the WOAH Terrestrial Animal Health Code;
- OR
- the donor animals and all teaser animals used in the collection of the semen have been tested with negative results for TGE using test methods recommended by WOAH:
- for fresh semen, the donor animals were subjected to a diagnostic test for TGE with negative results during the 30 days prior to collection
- OR
- for frozen semen, the donor animals were subjected to a diagnostic test for TGE with negative results at least 14 days after collection; and
10. the semen was collected, processed and stored strictly in accordance with the relevant criteria set out in EU legislation and WOAH Terrestrial Animal Health Code.
