II.5. Package markings		II.6. Number of packages	II.7. Net weight
II.8. Date of manufacturing		II.9. Batch numbers	

III Attestation

I, the undersigned official veterinarian, certify that the above mentioned processed animal protein described under part I and II complies with the following sanitary requirements:

1. The processed animal protein was derived from raw materials of healthy poultry that:
 - 1.1 were hatched and reared in Finland;
 - 1.2 originated from an area which is not under veterinary restriction due to Highly Pathogenic Notifiable Avian Influenza or Newcastle Disease;
 - 1.3 were slaughtered at an abattoir approved and supervised by the Veterinary authorities of Finland. Name and Approval number of the Abattoir _____;
 - 1.4 were subjected to ante- and post-mortem examination under veterinary supervision, were found to be free from signs of infectious disease and the meat was passed fit for human consumption;
 - 1.5 were not slaughtered in a disease eradication campaign.
2. The processed animal protein contains no material of bovine, ovine, caprine or lagomorph origin.
3. Samples have been taken for DNA-based analysis validated by the European Union Reference Laboratory for Animal Proteins in feedingstuffs. A copy of the test results, issued not more than 30 days prior to certification of the consignment is included with the documentation.
4. The processed animal protein was processed at the approved export processing establishment stipulated in Part I which is capable of achieving the heat and pressure treatment detailed below. In order to destroy pathogens and toxins which might be present in the material the processed animal protein:
 - 4.1 was processed to achieve an inner core temperature of:
 - 4.1.1 115°C for 45 minutes⁽¹⁾
 - 4.1.2 121°C for 15 minutes⁽¹⁾
 - 4.1.3 130°C⁽¹⁾
 - 4.1.4 when treated at 70°C for 30 minutes is not harmful to pet animals⁽¹⁾ **OR**
 - 4.2 was heated for at least 30 minutes, so that a temperature of at least 70°C was reached in all parts of the product during the production process and was further acidified to reach a pH of < 6.
5. Samples taken at random of the batch of the product to be exported, have been tested and comply with the following standards:
 - 5.1 *Salmonella*: absence in 25 g;
 - 5.2 *Enterobacteriaceae*: < 3 x 10² in 1 g;
6. Have been packed in new thermosealed bags/containers, or sewn polyprop bags with a plastic liner so as to prevent re-contamination, and marked "For Petfood and Feed for Farmed Fish Only";
7. Were containerised and sealed at the processing establishment under official veterinary supervision.
