

<b>1. 1. Shipment description</b>		1.5 Certificate No:			
1.1 Name and address of consignor:		 <p style="text-align: center;"><b>SUOMI FINLAND</b></p> <p style="text-align: center;"><i>Official pre-export support certificate for raw materials of animal origin <sup>(1)</sup> meant for manufacturing of non-productive animals (petfood) and feed for fur animals moved between Member States of the EU and intended for export to the Customs Union</i></p>			
1.2 Name and address of consignee:					
1.3. Place of destination					
1.3.1. Name and approval number of the establishment:		1.6 Member State of origin:			
1.3.2. Address:		1.7 Competent authority in the Member State (central):			
1.4 Means of Transport (the number of the railway carriage, truck, container, flight-number, name of the ship)		1.8 Competent authority in the Member State (local):			
		1.9 Member State of destination:			
<b>2. Identification of goods:</b>					
2.1 Name of goods/ <i>Наименование товара</i>					
2.1.1 <sup>(2)</sup> Type of animal/ <i>Вид животного:</i>		[bovine/ <i>крупный рогатый скот</i> ]	[sheep and goats/ <i>овцы и козы</i> ]	[pigs/ <i>свиньи</i> ]	[birds/ <i>птицы</i> ]
		[horses/ <i>лошади</i> ]	[rabbits/ <i>кролики</i> ]		
2.2 Date of production/ <i>Дата выработки товара:</i>					
2.3 Type of package/ <i>Упаковка:</i>					
2.4 Number org packages/ <i>Количество мест:</i>					
2.5 Net weight (kg)/ <i>Вес нетто (кг):</i>					
2.6 Number of seal/ <i>Номер пломбы:</i>					
2.7 Identification marks/ <i>Идентификационный номер:</i>					
2.8 conditions of storage and transport/ <i>Условия хранения и перевозки:</i>					
<b>3. Origin of goods:</b>					
3.1 Name, approval/registration number and address of the establishment					
- slaughter (processing) establishment					
- cutting establishment					
- cold storage					
3.2 Administrative territorial unit					
<b>4. Statement on suitability of feed for animals:</b>					
I, the undersigned State/official veterinarian certify that:					
The certificate is based on the following pre-export certificates (see attached list in case more than two) <sup>(3)</sup> :					
Date:	Number:	Country of origin:	Administrative territory:	Approval number of the establishment:	Name and quantity (net weight) of goods:
4.1 Raw materials meant for manufacturing of petfood and feed for fur animals exported to the Customs Union, were obtained from healthy animals slaughtered and processed in establishments, approved by the Competent Veterinary Service in the EU for supplying their production for export and operating under its constant supervision.					

<sup>1</sup> Bovine, sheep and goats, pigs, birds, horses and rabbits

<sup>2</sup> Cross out /delete as appropriate / *не нужно зачеркнуть/удалить*

<sup>3</sup> Delete if not relevant and confirm by signature and stamp

4.2 Raw materials meant for manufacturing of petfood and feed for fur animals exported to the Customs Union were obtained from animals that have been subject to ante-mortem veterinary inspection, their carcasses, heads and internal organs – to post-mortem veterinary-sanitary inspection by the State/official Veterinary Service.

4.3. Raw materials meant for manufacturing of petfood and feed for fur animals exported to the Customs Union were obtained from animals originating from premises or administrative territories officially free from the following contagious animal diseases<sup>4</sup>:

**4.3.1. For all species (except birds):**

- Foot-and-mouth disease - during the last 12 months in the country or administrative territory according to regionalisation;
- Anthrax - during the last 20 days in the premises.

**4.3.2. Bovines:**

- rinderpest and contagious bovine pleuropneumonia (apply only for lungs) - during the last 24 months in the country or administrative territory according to regionalisation;
- Raw materials meant for manufacturing of petfood and feed for fur animals were derived from healthy animals that:
  - originate from herds where there is no case of Bovine spongiform encephalopathy (BSE) and do not belong to birth cohorts of BSE positive animals;
  - have not received feed of animal origin, manufactured from protein processed from ruminant animals, excluding components permitted by the OIE Terrestrial Animal Health Code;
  - were not subject to a stunning process prior to slaughter with a device injecting compressed air or gas into the cranial cavity, or to a pithing process;
  - Specified risk materials (SRM) were removed according to the OIE Terrestrial Animal Health Code.

All measures in place in the EU Member States for the BSE control have been applied when preparing for export meat and raw meat preparations to the Customs Union.

**4.3.3. Sheep and goats:**

- Peste des petits ruminants - during the last 36 months in the country or administrative territory according to regionalisation;
- Rinderpest - during the last 24 months in the country or administrative territory according to regionalisation.

**4.3.4. Pigs:**

- African swine fever during the last 36 months in the country or administrative territory in accordance with regionalisation, or during the last 12 months if the disease has not been present upon confirmation by the data of epizootic and entomological monitoring;
- swine vesicular disease – during the last 24 months in the country or on the administrative territory according to regionalisation, or during the last 9 months, provided that stamping out was carried out in the country or administrative territory in accordance with regionalisation;
- Classical swine fever - during the last 12 months in the country or administrative territory according to regionalisation;
- - Aujeszky disease in the country, administrative territory or establishment and animals had no contact with other animals from establishments not considered free from the disease according to the OIE Terrestrial Animal Health Code recommendations (apply only for head, thoracic and abdominal viscera).

**4.3.5 Birds:**

- Highly pathogenic avian influenza (as defined in the OIE Terrestrial Animal Health Code) – during the last 12 months in the country or administrative territory according to regionalisation;

Or

during the last 3 months in the country or administrative territory according to regionalisation provided the relevant OIE requirements have been fulfilled (stamping out, disinfection and surveillance) and poultry, from which the poultry meat and raw meat preparations were derived, come from holdings not restricted for notifiable avian influenza;

Newcastle disease (as defined in the OIE Terrestrial Animal Health Code) - within the last 12 months in the country or administrative territory according to regionalisation;

Or

within the last 3 months provided that stamping out is applied in the country or administrative territory according to regionalisation provided the relevant OIE requirements have been fulfilled (disinfection and surveillance) with negative results.

**4.3.6 Horses:**

- African horse sickness - during the last 24 months in the territory of the country or administrative territory according to regionalisation or 6 months on the holding when control programme is carried out;
- Glanders - during the last 36 months in the territory of the country or administrative territory according to regionalisation or 6 months on the holding when control programme is carried out;
- equine infectious anaemia – during the last 3 months in the holding;
- lymphangitis - no cases during the last 2 months in the holding.

**4.3.7 Rabbits:**

- rabbit haemorrhagic disease – during the 60 days prior to slaughter in establishment where no case of disease was reported.

**4.4 Trichinellosis:**

4.4.1 Raw materials meant for manufacturing of petfood and feed for fur animals exported to the Customs Union were derived from pig carcasses that were either tested with negative results for *Trichinella* or have undergone processing that ensures inactivation of *Trichinella* larvae by the relevant treatment methods;

4.4.2 Raw materials meant for manufacturing of petfood and feed for fur animals originate were derived from horse carcasses that were tested with negative results for *Trichinella*.

**4.5. Scrapie:**

Raw materials were derived from sheep and goats, are meant for manufacturing of petfood and feed for fur animals exported to the Customs Union and have been obtained according to the OIE Animal Health Terrestrial Code recommendations for scrapie.

4.6 Package and packaging material are used only once and comply with requirements of the Customs Union.

4.7 Raw materials have identification mark on package or polyblock.

4.8 The means of transport were treated and prepared in accordance with the requirements of the exporting country.
